

To Whom It May Concern,

It is my pleasure to recommend Jung Hyun Rhoe, a highly talented and reliable Frontend Software Engineer whom I had the privilege of managing at Thriver.

While working with me, Jung Hyun consistently delivered high-quality work, meeting deadlines without compromising on code quality. He was instrumental in building and maintaining user-facing web applications using React and TypeScript, and his technical expertise played a vital role in the success of many key projects.

One of Jung Hyun's most impactful contributions was the development of reusable UI components. These not only helped streamline our development process but also ensured a consistent user experience across multiple applications. His thoughtful component design significantly reduced boilerplate code and improved overall team efficiency.

Jung Hyun demonstrated excellent collaboration skills, working seamlessly with the product team and design team to translate complex requirements into intuitive and user-friendly interfaces. His ability to communicate effectively across teams ensured alignment and contributed greatly to project success.

Jung Hyun's professionalism, attention to detail, and ability to balance speed with quality make him a valuable asset to any engineering team. I strongly recommend him for any frontend development role. Any team would be lucky to have him, and I have no doubt he will continue to make outstanding contributions wherever he goes.

Sincerely,

Sasha Gorelik

Engineering Manager at Gusto

(Formerly Engineering Manager at Thriver)
