

To whom it may concern,

My name is Ryan Taylor, and I am a Senior Staff Engineer at HelloFresh. From May 2018 to September 2022 I worked closely with Jung Hyun at Platterz (later Thriver), first as a fellow developer and eventually as his direct manager. During that time Jung Hyun constantly impressed me with his work ethic and abilities as a frontend engineer. He was extremely diligent, thorough, and relentless in his pursuit of quality UI/UX. I could always count on Jung Hyun to speak his mind in planning meetings and power through tickets when working on a feature. In my four years working at Platterz/Thriver, he was one of our most consistent and productive engineers, and it was a joy to work with him every day. It's rare to find someone in the industry with his level of consistency and commitment to the craft of software development.

I hope I'll get to work with Jung Hyun again in the future, but in the meantime any engineering organization would be lucky to have him as a teammate and contributor. Please do not hesitate to reach out if you have any further questions.
